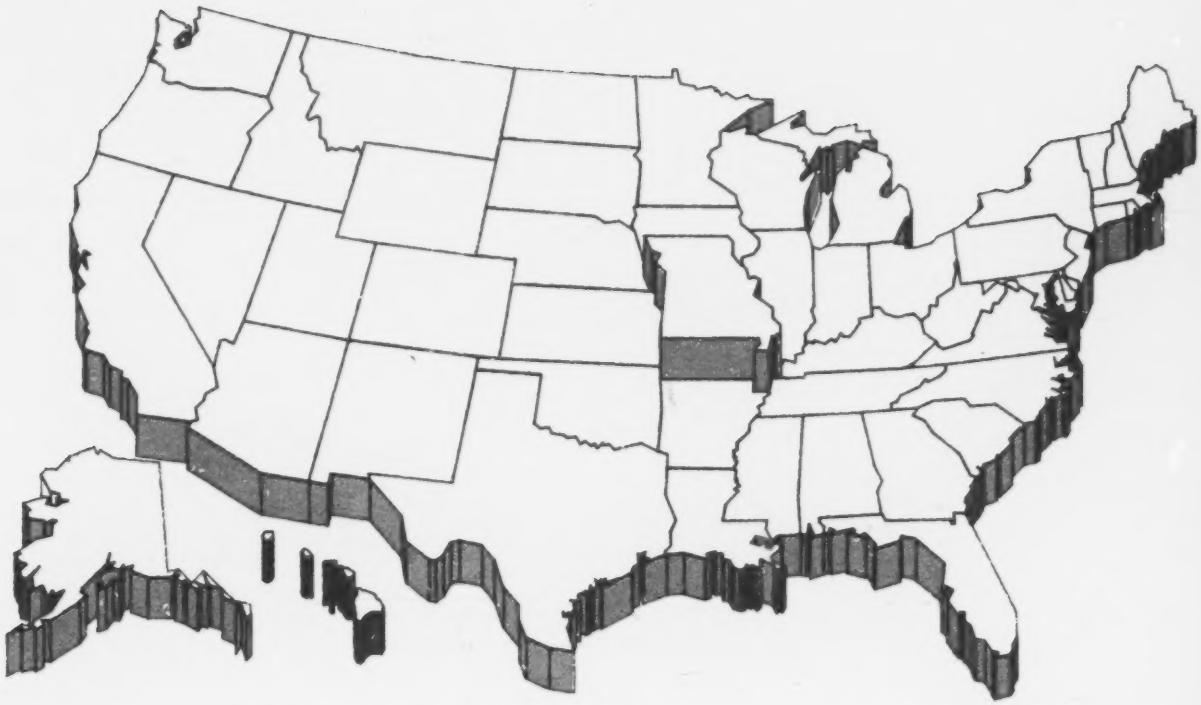
STATISTICAL ABSTRACT FOR MISSOURI 1985



Prepared by the
Research Center
College of Business & Public Administration
University of Missouri-Columbia

Preface

The 1985 edition of the *Statistical Abstract for Missouri* (*SAM*) seeks to provide as much comprehensive and timely economic and demographic information about Missouri as possible.

This edition of *SAM* includes several changes and additions. A section on Energy has been added. It provides data on the consumption of Energy in Missouri over the last ten years. Various charts and maps have also been included throughout this edition of *SAM*. In the Population and Vital Statistics Section the public school enrollment data has been extended to include the Fall head count information as well as accumulated enrollment.

In the Income, Employment and Prices section there are two new tables on Missouri Personal Income and Missouri Transfer Payments. The four tables on employment and output for major industries have been replaced with four new tables, they are: 1) Total Transfer Payments for Missouri counties; 2) Income, Maintenance Benefit Payments for Missouri counties; 3) Unemployment Insurance Benefit Payments for Missouri counties; 4) Per Capita Transfer Income for Missouri counties.

The six tables on the National Travel Survey and Truck Use Survey in the Transportation section have been omitted.

In the Public Sector section there are ten new tables on taxes in Missouri and the U.S.

The data in *SAM* is reported in as detailed a format as cost considerations allow. However, many of the data series are available in more detail and/or for longer time spans than is reported in *SAM* and will be provided upon request.

The Research Center would like to extend our thanks to various governmental agencies -- state, local and federal--and to many private institutions, for their cooperation in providing much of the data in *SAM*.

The Research Center also prepares statistical tables for Missouri counties. Those tables in the Table of Contents marked with a • can be purchased from the B&PA Research Center.

[1]Liquefied petroleum gases include ethane, ethylene, propane, propylene, butane, butylene, butane-propane mixture, ethane-propane mixture, and isobutane. The 1979-1982 LPG data may not be directly comparable to the pre-1979 data due to modifications to the LPG sales survey form and an updated sampling frame.

[2]Includes industrial and utility production, and net imports of electricity.

[3]Consumed at utilities to produce electricity.

[4]Net interstate sales of electricity is the difference between the amounts of energy in the electricity sold within a state (including associated losses) and the energy input at the electric utilities within the state. The net interstate sales, therefore, include associated electrical energy losses. A positive number indicates that more electricity (including associated losses) came into the state than went out of the state during the year; conversely, a negative number indicates that more electricity (including associated losses) went out of the state than came into the state.

*Represents small, non-zero value.

Note: Totals may not equal sum of components due to independent rounding.

Note: Does not include wood consumed by the non-utility sectors. Also excludes small quantities of other energy sources for which consistent historical data are not available such as: (1) solar energy obtained by the use of thermal and photovoltaic collectors; (2) wind energy; (3) and geothermal, biomass, and waste energy other than that consumed at the electric utilities.
